

TRESPA® TOPLAB® PLUS ALIGN

There is no Planet B. Trespa® TopLab® PLUS ALIGN addresses the issue of environmental care, providing the same high quality standards of Trespa® TopLab® PLUS with a strong commitment to the use of renewable materials.

By combining the benefits of proprietary technologies such as Electron Beam Curing and Dry Forming with the use of lignin-based adhesive for the core, Trespa® TopLab® PLUS ALIGN raises the bar of bio-based carbon content by up to 85%, to create durable and resistant worktops aligned with the needs of customers, as well as those of the planet.

Designed with a special consideration for the growing demand for a contemporary colour palette, to shape inspiring workplaces all over the world.
